

Our Group is a one-stop precision engineering solutions provider and machine tool manufacturer and distributor. Headquartered in Singapore, we have production and sales and service operations in the PRC. We serve customers from a wide range of industries including precision machine tool engineering, energy, electronic/ semi-conductor, automotive, oil, gas and marine, and aerospace industries. Our geographical markets are worldwide including the PRC, Europe and the Asia-Pacific region.

## **PROJECT MANAGER (EMA Awarded Project - ESS Test Bed)**

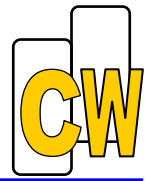

Reporting to the General Manager, the Project Manager will be leading a team of Engineers to manage the ESS Test Bed project, ensuring KPIs are met.

### **Job Description**

- Provide leadership in managing the ESS Test Bed project and be the focal point for key client.
- Work with key client contact for the product and service expectation and specification.
- Work with key partners for the supply of engineering, procurement and construction service for the product required.
  
- Lead and manage a team of engineers, technicians and field service representatives.
- Oversees the design and installation of the ESS project.
- Work with collaborated partners on research program activity.
- Take ownership and resolve all issues relating to the project.
- Ensure occupational health and work safety on all aspect of work being carried out in the fields for Live installations and daily operations.
- Assist in the development and implementation of initiatives in order to achieve specific financial, customer, operational and organizational goals.
  
- Assist in recruitment and employee orientation activities. Lead, mentor, grow and manage the talent pool and build organization's skill sets. Coach and provide career development advice to subordinates. Establish employee goals and conduct employee performance reviews.
  
- Other duties as assigned.

### **Job Requirement**

- Degree in Engineering or an equivalent qualification with at least 5 years working experience.
- Preferably at least two years of management experience or equivalent, in leading and developing technical teams and working with overseas team.

- Good interpersonal or relationship building skills.
- Strong communication and presentation skills (Written & Verbal).
- Proficiency in English and Chinese.
- Experienced in electrical power engineering project or installation.
- Prior experiences in dealing with SP or EMA and other government agencies for Live installation projects is an added advantage.

**Salary Range**

- Negotiable, Commensurate with relevant experience.
